

“We switched to Remote Backup Service; our tape backup system was just not reliable.”

Don't Rely On Tape Backups

Businesses are fed up with the unreliable nature of tape backup systems. Remote Backup Services from Mason Technologies has no tapes to wear out, no mechanical parts to break, and little if any human interaction. Built from the ground up to overcome the limitations that tape backup systems placed on the way you backup your critical data.

Mason Technologies
BUSINESS TECHNOLOGY SERVICES

Data Backup Made Simple

- Eliminate Human Errors
- Is your tape backup working?
- Are you sure?
- Does it notify you if there is a problem?

Avoid all these issues when you choose our Remote Backup Service!

Remote Backup is rapidly replacing these antiquated systems with a more modern approach to technology needs. Remote Backup Service is a simple and safe way to back up all the important data on your computer(s). A copy of your data is stored in a secure, remote location for safekeeping, so that in the event of disaster, your data is still retrievable to any computer you choose.

REMOTE SUPPORT

The way it works . . .

- OFFSITE DATA STORAGE
- AUTOMATED DAILY BACKUPS
- SECURE ENCRYPTED STORAGE
- AFFORDABLE SOLUTIONS
- DAILY EMAIL NOTIFICATIONS
- NO MORE TAPES

RESTORE NUMEROUS VERSIONS OF THE SAME FILE

Unlike tapes, we keep a minimum of 30 days of historical data, allowing you to choose previous versions of the same file quickly and easily with the click of the mouse! Maintaining HIPPA compliancy is very important because of all new government regulations now imposed on stored data and customer records. Our remote Backup solution is HIPPA compliant allowing you to store your data secured and encrypted offsite.

THE "BELT AND SUSPENDERS" APPROACH

If you keep your tape drive system, you should still use the remote backup service as a supplemental backup. Call it a "belt and suspenders" approach in that the remote backup solution runs daily to backup your critical data and allows you to restore your data in the event the server gets stolen, the tapes go bad, you have a fire, or your tape drives dies, or any other event catastrophic to your data. Since the Remote Backup solution runs as a separate application and does not use the tape drive, you can rest assured that your data is being backed up and stored offsite on our master server, **encrypted** and **secure**. If you do not have a tape backup in place already then this is a GREAT opportunity for you to backup you data with this service today!

Do not leave your backups to chance!

THE SIMPLICITY

 **Exchange, SQL and Open File**
Need to backup your email and or a critical database? We can do both. Exchange or SQL agents are included at no additional charge.

 **Email Notification Reports**
Ever wish you could get a daily email report letting you know the status of your nightly backups, now you can. We send out daily reports with the status of your nightly remote backup.

 **Point & Click File Restoration**
What good is any backup if the restore task is so complicated you cannot follow it? With our patented "point and click" file restoration, you simply choose the file you want to restore from the backup list and click restore.
